

L!VE issued guidance recently that our Covid-19 vaccination and masking policies will be changing. While we have done a great job keeping our infection rates down, these changes are a result of the upcoming transition to indoor events, high levels of infections due to Covid variants, and increased client demand for all-vaccinated crews.

Effective immediately, all crews will be required to wear masks when working indoors. This will not be enforced for outdoor events but will continue to be an optional personal preference.

Effective October 15th, all full-time and part-time employees, as well as contractors, will need to be fully vaccinated and maintain an ongoing vaccination status afterward. L!VE requests that every stagehand call has a written email reply stating that the crews are verified through your HR processes. We do not need to see anyone's individual vaccination card.
